See Knuth (1984) for additional discussion of literate programming.

Note

Note that there are five types of callouts, including: note, warning, important, tip, and caution.

? Tip With Caption

This is an example of a callout with a caption.

♦ Expand To Learn About Collapse

This is an example of a 'folded' caution callout that can be expanded by the user. You can use collapse="true" to collapse it by default or collapse="false" to make a collapsible callout that is expanded by default.
